

# Oncology Nursing Brown Bag Lunch

## Cancer Survivorship: Optimizing Clinical Outcomes, Health Status, and Well-Being after Cancer Treatment

***Sandra Mitchell, PhD, RN, CRNP, AOCN®***

*Research Scientist and Program Director,*

*National Cancer Institute, Outcomes Research Branch; and*

*Oncology Nurse Practitioner, Experimental Transplant and Immunology Branch*

*National Cancer Institute*

**DATE:** Tuesday, September 8, 2015

**TIME:** 11:30 AM – 12:30 PM

**LOCATION:** Admissions Conference Room, 1-5650

### Objectives

- Define Cancer survivorship
- Discuss the economic and legal ramifications for cancer survivors.
- Identify the factors influencing the occurrence, frequency, and severity of actual or potential late effects and second malignancies from cancer treatment.
- Develop a teaching plan for the patient family with consideration of cancer survivorship.
- Describe recent evidence findings related to survivorship and application of these findings into clinical practice.
